

Lecture Overview : Intro to HTML

In this lecture, you will learn -

- What is HTML?
- What is HTML Page Structure?
- Basic HTML Tags.
- How to create a list in HTML Page
- How to add images to your HTML Page.
- How to add internal and external links to your HTML Page.

At the end of this lecture -

- You will be able to create a web page that contains text, images and links using basic HTML tags.

To make the best use of this lecture, we advise you to keep the following points in mind -

Download / Install the Code editor suggested in the video: So that you can practice the code after every topic/concept covered in the video.

Note : You can use any code editor of your choice, installation guide for Sublime text editor is given.

Take Notes: While you are watching a video, it is always good to have a pen and paper to take note of all the important concepts covered in the video. It will help you in remembering those concepts better.

Try it yourself: After watching the video try to practice the same; if you get stuck, watch it again.

Additional Resources: We have covered all the important concepts through videos and notes , but it is always better to explore some additional resources available online. We have compiled some resources for your reference, though it is not necessary but if you are interested to learn more about a specific topic, you may explore them.
