Lecture Overview - Animations and 3D Space

In this lecture, you will learn -

- How to rotate, translate or scale HTML content in 2D and 3D space using the '**transform'** property?
- How to apply transition effects to HTML content using the **'transition'** property?
- How to apply animations to HTML content using the **'animation'** property and **@keyframes?**

At the end of this lecture -

- You will be able to apply animations and transformations to HTML elements using CSS properties and various CSS libraries available online.

To make the best use of this lecture, we advise you to keep the same points in mind as suggested for earlier lectures.
