Lecture Overview: Forms

In this lecture, you will learn -

- How to Create a Simple Form?
- What are different Input types in form?
- What are the different attributes of form elements?
- How to create different types of buttons?
- How to add a dropdown list and text area in forms?
- What are Media Tags?
- What is Favicon and use-cases of Meta tags?

At the end of this lecture -

- You will be able to create forms for your website with appropriate input fields.

To make the best use of this lecture, we advise you to keep the following points in mind -

Take Notes: While you are watching a video, it is always good to have a pen and paper to take note of all the important concepts covered in the video. It will help you in remembering those concepts better.

Try it yourself: After watching the video try to practice the same; if you get stuck, watch it again.

Additional Resources: We have covered all the important concepts through videos and notes, but it is always better to explore some additional resources available online. We have compiled some resources for your reference, though it is not necessary but if you are interested to learn more about a specific topic, you may explore them.
